FOR IMMEDIATE RELEASE:

ATLANTA, GA—SEPTEMBER 02, 2008— AccelerEyes is pleased to announce its partnership with The MathWorks as a Third-Party Connections product provider:

[Click here to see the Third-Party Page](#)

The MathWorks has a long track record of producing solutions for scientists, engineers, and the broader technical computing community. AccelerEyes is pleased to work with The MathWorks to enable the MATLAB® user community to ride the emerging GPU computing wave.

## **About AccelerEyes**

Founded in 2007, and located in Atlanta, Georgia, AccelerEyes is leading the software-side of the movement towards visual computing. AccelerEyes' products bring a level of supercomputing power to standard personal computers.

In order for high performance computing (HPC) companies to adopt GPU technologies, a robust and healthy software tool chain must be created to connect programmers to GPU hardware. While hardware manufacturers are building lower-level software tools, such as CUDA, which support their devices, AccelerEyes delivers high-level interfaces which remove the lower-level complexity.

AccelerEyes' first product, Jacket, is used by customers across all major HPC industries, such as the automotive, financial, medical, and seismic industries. Further, Jacket's Graphics Toolbox enables true Visual Computing, seamlessly merging the compute power of CUDA with OpenGL visualizations. AccelerEyes plans to adapt and expand Jacket for other hardware and software platforms.

AccelerEyes is a division of DivEyes, an Atlanta incubator for Digital Imaging and Vision Solutions.
